Gross Presentation (3rd grade and up)

Who we are?

Dr. Pearson is a Board Certified Pediatric Dentist. He has been practicing dentistry since 1999. He has had a thriving pediatric dental practice in Wylie since 2003 that has been providing excellent dental care to children that live in Collin County as well as many surrounding areas. He has devoted his life to improving the lives of children through regular positive dental visits as well as continued encouragement and education through our Tooth Fairy school program.

What we do!

One of our Staff will provide your group with a completely free oral health care presentation. Our "Gross Presentation" is a power point slide show that depicts graphic images of teeth that have not been cared for properly. We use this presentation to show the consequences of not brushing and flossing consistently and correctly. Topics covered are proper brushing and flossing, benefits/risks of toothpaste, healthy foods vs. cavity promoting foods, as well as demystifying any concerns about their visit to the dental office. We provide every child at the presentation with a free goodie bag that includes a toothbrush. We have been told by many teachers, nurses and parents that their kids come home so excited about their teeth that they can't wait to start brushing!

Our Mission

The mission of our office is to promote oral health care for children in our community while at the same time, providing education and motivation to improve the children's oral health care practices. We provide visits to all local schools, day care centers, church groups, mom's groups, health fairs and local community events.

A few things you should know

Because these presentations are 100% free, we stay extremely busy. Due to this and the graphic images in the "Gross Presentation," we have to limit our presentations to 3rd grade and up. We provide presentations to several schools per day. In order to keep our Gross Presentation schedule on time, we ask that the kids are gathered into a large area such as a gymnasium, library or auditorium for the presentation. We can present to all the kids at the same time, if all the kids can easily be accommodated into one large area, or we can present to each individual grade level or multiple grade levels. Unfortunately, we cannot provide presentations to each individual classroom due to our busy and limited schedule.

We encourage you to continue the tradition of promoting dental health by inviting us to all your school functions such as carnivals, fairs and of course in February for National Dental Health Month.

Sincerely,
Dr. Allen Pearson and Staff
